AI automation engineer and HR analyst, and co-founder of **CJ Studios**, an AI agency where I run the marketing, automation and website side for clients in Australia and India. I turn a client's problem into a system that runs every day: **n8n workflows**, **Claude agents and skills**, and **Meta and Google Ads** with the measurement rebuilt in **Google Tag Manager and GA4**. Six systems in production for four clients, with the proof at abhiram-anil.vercel.app. Background in **people analytics**, **HR automation** and **employee relations**, with **Power BI** and **Excel** for case trends and reporting.

WORK EXPERIENCE

CJ Studios

Australia (remote) • 06/2025 - Present

Co-founder & Co-owner: Marketing, Automation and Websites • Part-time

- Joined in June 2025 as the technical base of a production studio and helped establish it as an **AI agency**; co-own it and run client marketing, automation and websites, with **Claude skills** so each process repeats without me.
- **Five Star Training Academy, Brisbane**: rebuilt a **43-page** WordPress site on one layout system (11 location pages) and the Google Tag Manager container (GA4 events, Meta pixel, enhanced conversions), so every enquiry has a source; **10 KB of CSS removed** per route, **zero layout shift** on phones, **44 routes** checked on every deploy. Ongoing Meta and Google Ads reporting; **cost per lead down 12%**.
- **Security and cleaning contractor, South-East Queensland**: built **Tender Radar** in n8n, polling AusTender, QTenders and six council portals (**31 sources**), de-duplicating notices and scoring them against the company's categories; a **6:00 Slack digest** sorted by closing date replaced the manual morning check, at **zero licence cost**.
- **Engine-decarbonisation workshop, Kerala**: Meta **click-to-WhatsApp** lead campaigns with radius targeting; leads now arrive as WhatsApp chats, and a Claude skill pulls campaign status and writes the owner's weekly report.
- **Direct-to-customer fine jewellery label**: Shopify build plan and editorial homepage, AI-assisted product photography with fidelity checks, and an Instagram carousel system for daily posts.
- **Studio production system**: a 15-second reel pipeline on Seedance 2.0, Higgsfield and Kling, **concept to finished reel in one working day**; built cjstudios.tech in Next.js with no visitor tracking.

Codevantage

Coimbatore • 09/2025 - Present

HR Analyst & Automation Specialist • Full-time

- Collaborated with leadership to enforce company policies and standardize investigative procedures, ensuring fair and consistent outcomes for all staff.
- Developed automated reporting dashboards to track employee engagement and compliance trends, reducing manual reporting time by **40%** and identifying risk areas early; consolidated people data from **five spreadsheets into one dataset** behind a weekly leadership view.
- Contributed to **OpenClaw**, an open-source agentic AI framework — designed and configured autonomous AI agents and multi-agent pipelines, gaining hands-on experience in **LLM orchestration**, **agent memory systems**, **tool-use patterns**, and **persona-based agent design** for real-world task automation workflows.

Symega Food Ingredients Limited

Ernakulam • 04/2025 - 09/2025

Logistics • Internship

- Gained hands-on experience with SAP logistics modules for tracking shipments, managing dispatch records, and processing tax invoices and e-way bills.
- Conducted independent analysis on dispatch throughput and proposed a predictive delivery model using Python and machine learning to enhance accuracy in delivery forecasting.

EDUCATION

Master of Science in Data Science with Logistics and Supply Chain Management

Amrita Vishwa Vidyapeetham • GPA: 8.39

Coimbatore • 09/2023 - 05/2025

Bachelor of Computer Applications in Data Science

Amrita Vishwa Vidyapeetham • GPA: 7.5

Kollam • 01/2020 - 01/2023

PROJECTS

Portfolio: Send the problem. Get back a system.09/2026 - 10/2026

abhiram-anil.vercel.app

A scroll-driven portfolio told as one working day: the AI updates I read, what I kept, and what it changed for four clients, with the proof pinned to a board and a brief form that matches a visitor's problem to the closest case.

Tech Stack: Next.js 16 · React 19 · TypeScript · Tailwind CSS · Three.js · GSAP · Vercel

Prompt Engine02/2026 - 03/2026

prompt-engine-main.vercel.app

Built a production-grade AI prompt engineering platform that transforms plain English descriptions into structured, expert-level prompts using LLaMA 3.3 70B via Groq API — achieving quality scores of 28–30/30 consistently.

Tech Stack: React · TypeScript · Vite · Tailwind CSS · Node.js · Express · PostgreSQL · Vercel · REST API

HR Compliance & Risk Analytics Dashboard12/2025 - 02/2026

- Designed a **Compliance Dashboard** in Power BI that aggregated employee activity data to identify potential policy violations and **risk areas** in real-time.
- Analyzed workforce trends to support the **Employee Relations team** in making data-driven decisions regarding resource allocation and policy updates.

AI-Driven Talent Assessment & Automation Suite10/2025 - 01/2026

- HR Automation:** Engineered a Resume Analysis Agent that parses incoming CVs, extracts key skills, and scores candidates against job descriptions, streamlining the recruitment lifecycle.
- Built an **automated triage system** (using n8n) that categorizes incoming employee requests and routes them to the correct department, improving response times and **SLA compliance**.
- Created a **Policy FAQ Bot** on Slack to instantly answer routine employee questions about benefits and leave, reducing the caseload for the HR team.

Medical Image Analysis using Deep Learning Models12/2023 - 05/2024

- Evaluated and compared the performance of deep learning models including MobileNet, VGG-19, CNNs, and Swin Transformer on a medical image dataset, achieving up to 92% classification accuracy.
- Identified Swin Transformer as the most effective model for fine-grained classification, reducing false positives by 18% compared to traditional CNN architectures.

SKILLS

Programming Languages - JavaScript - Python - R Programming - SQL - TypeScript	AI & Automation - n8n - Claude & Claude Code - OpenClaw - MCP tools - Prompt engineering	Marketing & Measurement - Meta Ads - Google Ads - Google Tag Manager & GA4 - HubSpot - Shopify & WordPress
Databases & Analytics - Excel - MongoDB - Power BI - Tableau	Frameworks - Next.js & React.js - Django - Bootstrap - Scikit-learn	Tools & Platforms - SAP - ServiceNow - Vercel - Visual Studio Code
